

Document Retrieval System

HIPAA Security Features

- **All readable images and documents are saved to the hard disk with 128 bit encryption**
- **Once encrypted, images and documents can only be accessed through Drs system**
- **Security groups determine which chart types can be viewed or edited**
- **Users can belong to up to 30 security groups**
- **Drs automatically maintains an audit trail for every document**
- **Audit trail tracks who the user is and when the user has accessed, edited, or moved the document in the patient chart**
